

STEM STUDENT COMMUNICATION NETWORK RESOURCES AND SERVICE HANDBOOK

How to Use This Handbook

This Handbook is designed to help you and your organization navigate through many of the most active communication and advertising channels for STEM-interested students here at UNM. The information listed in this Handbook is public and free for all faculty, staff, and students to use.

The Handbook is divided into two sections: Networking Resources and STCC Networking Services. The Networking Resources section lists various methods for reaching UNM's STEM communities, including campus bulletin boards, listservs, and more. The STCC Networking Services section details the ways in which the STCC can assist you with networking across campus. These services include advertising in our weekly STEM Bulletin, distributing fliers, and more.

Please note that you do **not** need STCC support or approval to use any of these modes of communication. We offer this Handbook as an opportunity to be of informational service.

If you have questions about any part of this Handbook, if you see something that is incorrect or needs to be updated, or if there is something not covered, please contact STCC Staff via phone at (505) 277-0878 or via email at stem@unm.edu. We want to hear from you!
